- Filmmaker-quality screen recorder: For those times when you want to shoot a short video, you can turn your head and rewind with a simple tap. In addition, you can use the video you capture to edit your photos anywhere you have Wi-Fi.
- Adjust a photo’s exposure, contrast, and more with one-touch panes that intelligently respond to the lighting conditions and colors of the image you’re capturing. And, as you zoom in at any point of an image, Photoshop will automatically detect the best levels of contrast and exposure for the full image.
